

Kideas

Milk Jug Piggy Bank

Materials:

- 1 gallon milk jug, washed
- 2 empty toilet paper tubes, cut in half at 45-degree angles as four "legs"
- 1 sheet paperboard
- white acrylic primer, red paint, and brush or sponge
- 1 pink pipe cleaner
- masking tape, scissors

Kideas Tip:
Lightly sand jug before project to better allow for the paint to adhere to the surface. Using primer instead of white paint as a base also helps, and is more economical.

Directions:

1. Cut ear shapes from paperboard, using the pattern here if desired.
2. Firmly attach four "feet" and ears to jug with generous use of masking tape, as pictured to the left.
3. Cut coin slot and smooth over with masking tape.
4. Mix a few drops of red paint into white primer, and apply to pig with brush or sponge.
5. Insert tail and embellish with finishing touches such as googly eyes (optional), inked face, etc.

Insert coins in slot. To remove coins, simply unscrew the "nose"!
