

# Kideas

## Homemade Sticker Book

1. Place sheet protectors in binder, inserting construction paper. Use multiple sheets if necessary to achieve desired thickness.
2. Stickers should be placed on *on top* of sheet protectors. The smooth surface will allow for the stickers to be removed and applied repeatedly.
3. Consider themed pages, and/or using a variety of construction paper colors to create interesting backdrops for the stickers.

### Materials:

- 3-ring binder
- heavyweight clear plastic sheet protectors
- construction paper
- stickers!

4. Decorate the binder cover with stickers, markers, or other materials. Here we used a black sharpie, and cut blue masking tape to create the child's name.

*Now your child has a special place to keep their most treasured stickers!*
